

I recently heard about the FCC and their new broadcast system (low power fm). The FCC is proposing to expand this system, which will take priority over smaller FM translators. This will take away my and hundreds of thousands of peoples opportunities to listen to wonderful radio stations such as AIR 1. AIR 1 serves me as a resident of my local community by uplifting me daily and allowing me to listen to good wholesome music with out all of the filth that other stations offer. If AIR 1 is diplaced by an LPFM broadcaster it will be devastating to me,my local community and the other hundereds of thousands of people who listen to AIR 1 and radio stations like it. AIR 1's service is in the public interest because many people listen to AIR 1 for their support each day. Please take this to heart and don't let the FCC expand their service in a way that will interupt wonderful stations such as AIR 1. I appreciate your time. God bless you! Sincerly, Mindy
